Since 1989, the subsidiary Gallimard Loisirs has been publishing guidebooks that are the fruit of constant exploration and undisputed standards of quality, in addition to travel books.

Practical ecology, architecture, design, photography, street art and the culinary arts are among the main subjects focused on by Éditions Alternatives, which has been varying and evolving according to tastes, inclinations and the spirit of the times since 1975.

Since its creation in 1984, Éditions Hoëbeke has endeavored to diversify, to delve into both the past and present, to publish and also create, refresh genres, combine forms of expression, tell stories in a new way, remain unfettered, surprise, reawaken your enjoyment, take you on a journey, astonish you and – we hope – bring back happy childhood memories.

Letters about Light

Paolo Roversi and Emanuele Coccia share an outstanding conversation about photography and technique in an exceptional title, illustrated by Paolo Roversi's photographs.

Paolo Roversi is one of the most famous fashion photographers and portraitist. Emanuele Coccia is a philosopher, thinker on eternal transformation as well as a fashion enthusiast. They have chosen to share their thoughts through the epistolary genre.

This correspondence revolves around light, taking as its starting point the photographer's observations, sometimes

technical and always poetic, to which the philosopher responds by expanding on the wider field offered by philosophy.

In the course of twelve exchanges, punctuated by emblematic photographs taken by Paolo Roversi, the two authors there reveal their unique personalities.

Astrology Mirror
by Christian Lacroix

Discover Max Jacob and Claude Valence's *Astrology Mirror* reinterpreted by Christian Lacroix's twinkly drawings.

A poet, novelist, painter, and a major figure in the world of culture in the first part of the 20th century, Max Jacob was also passionate about astrology. His meeting with astrologer Claude Valence (real name Conrad Moricand) produced a text that was published in 1949 after the poet's death: *Astrology Mirror*.

While Claude Valence deals purely with astrology, Max Jacob paints portraits of women of each star sign, providing a real literary pleasure to the reading of this manual.

Passionate about astrology and Max Jacob's writings, the great designer Christian Lacroix gives a new life to the work that has been out of print for decades.

Inspired by the style of the 1930s-1940s, Christian Lacroix draws both the bestiary of the zodiac and the women of each star sign Max Jacob described. He takes readers on a journey of discovery into the esoteric world of Jacob and Valence's astrology.

Lucio Fontana
“There has been a future”

Towards the end of his long creative life, Lucio Fontana (1899-1968) said with satisfaction: “Forty years ago, one could talk about a future. As before, one cannot tell today what the future holds. But with my forty-year career and thanks to what I see in the art world, I can tell there has been a future.”

With this ambiguous phrase, the artist referred to the conceptual renewing of art he once firmly believed in.

This catalogue offers a journey in Fontana’s whole work, before and after the Second World War, in both Argentina and Italy. With this book, discover the immense variety of his creations: paintings, papers,

sculptures, and ceramics, as well as ambient, luminous, and spatial installations.

Through artistic concepts such as *Concetti spaziali*, *Attese* and *Buchi* (“spatial concepts”, “expectations” and “holes”), readers will discover an artist who is both figurative and informal, classic and futuristic... In short, a key figure.

The Art of Skateboarding

A sport, a means of getting around and a symbol of popular culture: skateboarding is all these things and much more. From the empty swimming pools of Los Angeles in the 1960s to Olympic skate parks, skateboarding is now accessible to the wider public and has spread across the planet.

Skateboarding's ubiquitous appeal has led to it being featured in cinema, music, streetwear, video games, specialist publications and art. Skateboarders, their stamping grounds and their paraphernalia have led to the emergence of a street culture in its own right that is still unrecognised. The prowess in the manoeuvring, the spontaneity of gatherings, the spirit of competition all reveal care for the beauty

of a perfectly mastered trick and the desire to pass on skills.

This book looks at this phenomenon and also shows how renowned artists and street artists – Felipe Pantone, Shepard Fairey, Hopare and D*Face, among others – have invested in the field by creating collectable skateboards.

The Picture of Dorian Gray
Illustrated by Benjamin Lacombe

The talented Benjamin Lacombe illustrates Oscar Wilde's masterpiece, with an afterword written by Merlin Holland, the writer's only grandson.

This illustrated edition tells the story of the young Dorian Gray, ready to offer his soul so that his portrait may age in his place, without imagining the consequences...

Benjamin Lacombe highlights themes such as Art, youth, morality and hedonism, and focuses on the figure of Dorian

Gray, the embodiment of beauty, sowing death and desolation, which he illustrates through a process that strips away the layers of superficiality to reveal the heart of monstrosity.

A literary gem that invites us to reflect on the meaning of our lives.

Black Ocean

This book tells the story of the triangular trade, resulting in the the largest forced migration in human history, focusing on its long-lasting impact on the Black people. It is the story of the powerful African kings, the slave traders but also of the captives taken to the American continent, carrying with them their culture and traditions.

To tell the story of this extraordinary odyssey, the artist William Adjété Wilson has chosen the age-old practice of «appliqué», a traditional Beninese art technique.

With the complicity of the master tentmakers still active in Benin, he created eighteen large cotton hangings, representing key moments in the history of the Black community, who is

also the history of the crossing of the Black Ocean.

The author makes us think about our relationship with the world, the question of diversity and the stereotypes of our societies. It is a book at the crossroads of Africa and the West.

Pour profiter au mieux de votre séjour, laissez-vous guider par les mineurs et l'Atlas en toile de fond.

Tout autour, le quartier Mouassine et ses palais baroques de créateurs sont un terrain de jeu idéal pour une expédition de la vie réelle. On y trouve des peintres, des sculpteurs, des artisans et des artisans de la vie. C'est un lieu où se trouvent des ateliers de travail et de création. With a wealth of original material, drawn, illustrated and photographed by our cartographers, artists and photographers.

Aimed at two readerships:

- The inhabitants who want to keep the memory of their region alive and retain the knowledge of their environment.
- The visitors who want to share such knowledge, culture, and memories.

Technical details

112 x 225 mm - €18.50 to €29.50 - 288 to 576 pages

Available titles

Alsace, Amsterdam, Athens & Peloponese, Bali, Brazil, Brittany, Budapest, California, Crete, Croatia, Cuba, Denmark, Mexico, Moccroco, Naples & Pompeii, New York, Paris, Prague, Provence, Québec, Rajasthan, Rome, Route of the Mayas, Santiago de Compostela, Egypt, England & Wales, Florence, France (Heritage of), Holy Land, Ireland, Istanbul, Italy, Loire Valley, London, Louvre, Madagascar, San Francisco, Scotland, Seville and Andalusia, St Petersburg, Thailand, Tunisia, Tuscany, Venice, Vienna

The contents:

- Keys to understanding Nature
Preserving our natural heritage is one of the major concerns of the 21st Century. Getting to know our fauna and flora is a first step towards learning to respect them.
- Keys to understanding Culture
The cultural wealth of each country is not simply limited to its monuments and great historical events. The Guides go behind the scenes to revive the memories of people and places through architecture, history, lifestyle, art and literature.
- The itineraries
Each itinerary starts with an "itinerary-map", then a step-by-step visit of streets, lanes, even riverbanks, all with the most interesting houses, castles, churches and other sites along the way. The traveller is invited to follow well-worn paths but also to wander off the beaten track, to satisfy her curiosity according to her particular interest and the time available.
- Practical information
Found at the end of the book, this section provides useful information for the traveller and a choice of addresses (hotels, restaurants, etc.)
- Maps
The last pages of the guides are devoted to complete maps with street indexes. Each guide provides the tourist with detailed and updated maps to find his way without the need of a complementary map. Subway and bus maps are also included in this section.

And also

- At the beginning of each book, specific pages show the reader how to easily find the information he needs throughout the book:
- "How to use this guide" double-spread;
 - The highlights: illustrated and localized on a general map;
 - Summary: with page references;
 - Map of the itineraries.

THE NEW FACE OF ENCYLOPAEDIAS

Since 1986 “Découvertes Gallimard” has been offering its readers a voyage along the paths of knowledge. With many sub-series such as Archaeology, History, Exploration of the World, Religion, Natural History, Science, Painting and Music, these books interweave their themes to form an encyclopaedia of the 21st century, with immediate access to information and in-depth coverage of each subject.

THE PASSION OF DISCOVERY FOR THE WIDEST READERSHIP

The original approach of “Découvertes” appeals to a wide public, from the self-taught to the scholar, from the curious mind to the student, from the teenager to the elderly.

A FASCINATING INTERPLAY BETWEEN TEXT AND IMAGES

The lead-in pages take the reader straight into the subject, which enlivens and highlights the information, while the layout, with its wealth of illustrations, inserts, foldouts, and captions allows the reader to follow the narrative or to leaf through like a magazine.

Technical details

125 x 178 mm - 96 to 128 pages in 4/4 + 32 to 64 pages in 1/1 - Wordcount: 25,000 to 40,000 - sewn binding, glossy laminated cover

D-Day: The Normandy Landings

On the threshold of Tuesday 6th June 1944, more than 200,000 men, whether British, American, Canadian, and French, landed on the Normandy beaches called Omaha, Utah, Gold, Juno, and Sword.

Since 1942, Churchill, British Prime Minister, and Roosevelt, the President of the United States, were preparing Operation Overlord, the biggest amphibian operation of all times. That morning, under the command of Eisenhower, American general, Supreme Commander for the Allied Powers, and British general Montgomery, it begins.

The author Anthony Kemp, historian and World War 2 specialist, takes us through the two months of the Battle of Normandy, tracing the final phase of the liberation of Europe.

Découvertes Octavius

An exhibition in book form

Thanks to a very original format, small books grow large - but the price remains low. Books that fit in anyone's pocket, and are afforded by everyone's wallet. Découvertes Octavius is made of 8, 10 or 12-page units that unfold to reveal large illustrations. It is a brilliant concept that incorporates the practical aspect of art magazines (focusing on specific subjects) and the quality of a traditional art book, combined with a bold foldout format and lively texts aimed at a large audience.

This concept allows the authors to explore both texts and illustrations in a dynamic and revolutionary layout that gives different levels of interpretation and offers new reading possibilities. Each book is illustrated by magnificent reproductions

of masterpieces, pictures and documents in the different foldouts, thus offering new ways of discovering art and establishing links between texts and images.

The texts are short (2,000 to 5,000 words) but not simplified: subjects such as these need concise, high-quality texts.
