Preface

Publisher's profile

Hauschka Verlag has been publishing learning and study material for more than 45 years. Our products empower children to study on their own and allow them to focus on areas they're struggling in to strengthen their skills.

We trust children's independence. Children become motivated when they are able to do things on their own, so all our products give them plenty of opportunities to solve puzzles and tasks with or without help from the adults in their life.

We recognise that children learn best when they can easily understand the materials they work with. That is why all our books and blocks have been quality-tested extensively by both children and teachers.

We know children can do more than they think. Our books and blocks contain a wide variety of tasks that challenge children to learn, reflect and improve their skills without ever feeling like they are bored by studying.

Our unique approach and testing requirements mean that children who work with our products can refresh previously acquired knowledge, improve topics they missed out on, and get on track for a lifetime of learning – all while having fun.

Selling points

- quality based on over 45 years of experience
- perfect for at home and on the go
- wide variety of easily understandable content suited for children
- foster independent and motivated learning, practising and revising
- edited with and tested by children
- individual and goal-oriented learning in small steps
- tests to review and solidify learning progress
- removable answer sheets
- maths books with thorough solutions and detailed explanations
- independent from textbooks
- Amazon bestseller with top rankings

Learn and have fun in nursery school

Our exercise blocks for children in nursery school help children to playfully improve their concentration, motor skills and visual perception. They will learn how to look and compare pictures carefully and how to think logically. The blocks offer ideal preparation for nursery and primary school. All exercises feature lovely child-friendly illustrations.

The handy size makes our blocks the perfect companion at home and on the go!

Preschool

613 Preschool book–
Discover numbers

Discover numbers

Children learn about the numbers 1 through 10 in varied and lovingly illustrated tasks. They develop an understanding of quantity, learn to distinguish between geometrical shapes and how to apply logical thought. Willi the raccoon accompanies children on their journey through the world of numbers.

A removable mathematical game boosts motivation and improves the learning process.

Mathematics

71 Primary school –
Training mathematics – Year 1

Training mathematics – Year 1

Coco the monkey will take children on a journey through the world of mathematics. They learn how to write, identify and compare numbers – first up to 10 and then up to 20 – before they start arithmetic. This book offers a wide array of mathematical tasks: arithmetic problems, reading analog and digital clocks, calculating time and small sums of money. Pupils will also learn about shapes and how to solve word problems. Interesting and entertaining puzzles keep maths fun and rewarding.

Mathematics

72 Primary school –
Training mathematics – Year 2

Training mathematics – Year 2

This book helps children train all important subject areas in year 2 maths. Each chapter covers a different subject area (including arithmetic involving numbers up to 100, multiplication tables, geometry, quantities, calculating time and money, and basic combinatorics) so children can focus on what they need to improve. Tests at the end of each chapter make sure parents and children can review and self-assess their current knowledge. Coco the monkey will help and motivate children to master numbers and mathematical principles.

Training mathematics – Year 3

Training mathematics – Year 3

Coco the monkey will continue to show children the world of maths and numbers. The book contains fun and varied exercises about the central topics from year 3 maths class. Children will learn how to solve problems with numbers up to 1000, basic arithmetics, geometry, quantities, probability and combinatorics. Every chapter finishes with a test that helps pupils confirm they understood the material and can apply mathematical principles. Puzzles make sure maths never gets boring, and Coco the monkey will keep children entertained and focused on their tasks.

Mathematics

74 Primary school –
Training mathematics – Year 4

Training mathematics – Year 4

Many pupils feel challenged by maths in year 4. Pupils will revise and practise their skills solving maths problems with numbers up to one million, advanced geometry problems and the application of the basic arithmetic operations. Various puzzles keep learning fun and engaging. Every chapter ends with a test that demonstrates pupils' skills to parents and teachers and in-depth solutions allow children to work independently and at their own pace. Successfully finishing this book qualifies pupils for a smooth transfer to secondary school.

Word problems – Year 4

Word problems – Year 4

This book is one of our oldest and most successful products. Pupils can work through more than 120 interesting word problems that gradually become more difficult. They will learn how to independently solve exercises that deal with the four basic arithmetic operations, units of length, weight, size and time. This book is especially suited for children who are struggling in class and helps them internalise useful strategies for word problems. The extensive illustrated solutions allow them to check their progress without shaming or belittling them. Puzzles and riddles make sure all pupils enjoy working with this book and experience maths as something fun.

Maths adventure – Journey to the Middle Ages

Anna and Felix are twins. Their summer vacation at their grandfather's old mansion turns into an exciting adventure when they discover a mysterious machine that lets them travel back in time. Stuck in King Arthur's legendary realm, they have to solve many mathematical puzzles to find the machine's inventor and solve the theft of the royal crown from the king's court. This book is packed with exciting riddles, exercises and mathematical games that let children help the characters on their journey to the Middle Ages.

Fun with times tables! Years 2 and 3

Fun with times tables! Years 2 and 3

Quick recall of basic times tables is an important skill that pupils have to acquire during their first years of school and is the basis for future maths class and real life. Learning them often means hours of boring repetition and studying, but this block helps children review and practise their time tables with fun and engaging exercises until they know them all by heart! Their handy size makes the block perfect for any trip and outing – this way, children can train and review on the go.

Learn to read and understand stories

Children learn how to read at very different speeds. These blocks are suitable for all children who have mastered their letters and want to practice reading short stories about the world, animals, sports, school or the holidays. They will discover a new story on each page and answer simple questions to make sure they understand words, context and derive meaning from pictures.

These blocks feature beautiful, child-friendly and diverse watercolour illustrations.

My first book of English words

My first book of English words

This book introduces children to lots of useful words. Each spread focuses on a specific topic and is illustrated by a set of beautiful watercolour images. Children will have to fill in the correct words for each picture. This way, learning vocabulary feels like doing a fun puzzle exercise that motivates children and improves recall. A short removable dice game gives children even more opportunities to practise their English. They can also practice looking up words independently with an alphabetical word list.

This tailor-made exercise book will make struggling with tenses a thing of the past. Children and adults are taught the differences between and pitfalls of present progressive and simple present in small steps. Developed by an experienced English teacher, this book focuses on problem areas and can be used regardless of the book used in class. While pupils will be able to use this product independently, each chapter ends with a test that parents and teachers can use to evaluate progress and understanding of the subject.

305 Secondary School –
Simple Past and Present Perfect – 2nd year of English

Simple Past and Present Perfect – 2nd year of English

It can be challenging to correctly use tenses in English. This book teaches children and adults how and when to use simple past and present perfect and is completely independent of any course book used in class. The focus on two specific tenses and the differences between them allows pupils struggling with this topic to practise and study independently. It's easy to keep track of progress and skills with the tests after each chapter and the final test at the end of the book. Solutions to all exercises are included.

321 Secondary School
Important Grammar – 1st year of English

Important Grammar – 1st year of English

The first year of English introduces many important rules of grammar to pupils. This book lets them study and revise, either step-by-step or by focusing on topics that they're struggling with. They will receive in-depth explanations and tips to avoid common mistakes before completing exercises until they have full control of their language use while writing and speaking. The book includes solutions to every exercise so pupils can study independently, and several tests that parents and teachers can use to supervise progress.

322 Secondary School
Important Grammar – 2nd year of English

Important Grammar – 2nd year of English

This book helps pupils to revise the most important rules of grammar they learn during their second year of English. Each chapter offers detailed explanations of the topic and tips from an experienced English teacher so children who are having trouble with the subject can learn at their own pace and complete exercises that strike the perfect balance between repetition and a challenge. By using the included solutions, pupils can work independently while parents and teachers can check their progress with tests at the end of each chapter.
