WE TREAT EACH OTHER WELL

Lucía Serrano

Beascoa • 2023 • Hardcover • 248 x 288 mm • 36 pp

A book about friendship, respect, and the importance of treating each other well.

It's not mandatory to be friends with everyone. But it is mandatory to treat each other well. Do you know how to do that? This book by Lucía Serrano starts from the fact that we are all unique and different; from there, it explains how we relate to others. Sometimes, relationships are calm and peaceful. But other times, we might feel bad because of what others do. Or maybe we're the ones making someone else feel bad? Using a series of good conduct rules, the book concludes by explaining what we need to do. Because even though being friends with everyone isn't required, we absolutely need to know how to get along.

NO LABELS!

Lucía Serrano

Beascoa • 2024 • Hardcover • 248 x 288 mm • 36 pp

A new picture book by Lucía Serrano that sparks discussion about labels and stereotypes.

The kids in the class call each other by some pretty strong words: "Bossy," "Hitter," "Liar"... "Watch out for labels!" the teacher warns them. Words are important for defining who and how we are, but people aren't just one thing—we're a whole mix of things. That's why we have to be careful when we pigeonhole others with a single tag.

- Lucía Serrano presents a new book on an essential topic: self-esteem.
- A bestselling author and a key resource for families and educators.
- Her books are a practical tool for instilling values in young children.

I LOVE MYSELF A LOT!

Lucía Serrano

Beascoa • 2025 • Hardcover • 248 x 288 mm • 36 pp

Lucía Serrano is back! Me quiero mucho is an essential picture book for talking about self-esteem with little ones.

When someone makes fun of our body, it makes us feel bad. We think we're not good enough, that there's something wrong with how we are. That feeling gets stuck inside, and it's hard to ignore. Maybe that's because our daily lives are surrounded by images of bodies that seem to be the only "right" kind. Or maybe feeling that there's something wrong with our body makes us think no one will ever love us, and that's a really scary thought. This book is an invitation to change the way we look at ourselves. We can learn to do it with kindness. And looking at yourself with kindness is a superpower.

- She has sold over 40.000 copies of her books for adults.

I AM A GOOD PERSON

Patricia Ramírez/Pedro Herráiz • Candela Ferrández
Beascoa • 2025 • Hardcover • 230 x 280 mm • 96 pp

A fully illustrated, full-color book about values that helps children develop kindness, integrity, and authenticity.

RESPECT, GENEROSITY, LOVE, JUSTICE, EFFORT, RESPONSIBILITY, GRATITUDE, PATIENCE, COMPASSION, FORGIVENESS, KINDNESS, and HOPE.

These 12 values—one for each month of the year—are introduced in a fun and simple way through conversations between Patri, her children, and Perico. By sparking meaningful discussions, the book helps strengthen family bonds and supports children's emotional and personal growth.

It also includes weekly activities that make learning about each value an engaging and enjoyable experience for the whole family.

Becoming a good person starts with the desire to be one, and when we support each other along the way, the journey becomes even more rewarding

CUMPLIDOS Y RECONOCIMIENTOS

¿Qué os parece, queridos niños, si esta semana nos dedicamos a reconocer las cosas maravillosas, por pequeñas que sean, que hacen los demás? **Cuando elogias a alguien**, es decir, cuando le dices que ha hecho las cosas bien, **esa persona se siente hermosa por dentro, con confianza**. Es maravilloso que con solo unas palabras podamos transformar la vida de los demás.

Mamá, yo te voy a hacer un elogio, ¡ja, ja, ja, ¡técnicas genial!
De verdad, mamá, siempre está todo riquísimo.

Si, mamá, a mí me encanta tu comida.

Muchas gracias, mis niños. Me encanta cocinar y me encanta que la disfrutéis. Para mí cocinar es una forma de repartir amor.
Qué bien me siento cuando oigo que os gusta mi cocina.

Mamá, tú **nos das muchas cosas bonitas**, ¿te gusta decirnos cosas bonitas?

Me encanta, mi vida, me gusta reconocer todas las cosas maravillosas que hacéis, porque os las tenéis que creer. Sois estupendos.

Gracias, mamá. Tenemos una familia muy bonita, ¿verdad?

COMPARTID en vuestros momentos en familia todos esos **ELOGIOS** que hacéis a los demás y comentad cómo se han sentido. ¿Y mañana a quién vais a alegrar el día y qué le vais a decir? Contadme, pequeños, que os escucho.

Yo voy a ayudar a los más pequeños esta semana en el comedor del colegio.

Qué buena idea, mi vida, seguro que se sienten superagradecidos.
Yo voy a ayudar más a la abuela con sus recados y sus médicos. A veces no le dedico todo el tiempo que me gustaría.

Yo también quiero ayudar, mamá, ¿qué favores puedo hacer?

A mí se me ocurren muchos, Pablo. Por ejemplo, sacar la basura y así ayudar a mamá.

¡Genial! Me lo apunto en la agenda para que no se me olvide. ¿Y a mis amigos...?

Piensa a ver quién necesita ayuda.

¡Ya lo sé! Voy a ayudar a Eric a leer en el recreo, no se le da muy bien.
Y también puedo ayudar a la abuela a divertirse.

Si, siempre dices que quiere jugar conmigo. Pues sí juego con ella la ayuda a divertirse, ja, ja, ja.

¿A divertirse?

¡Qué bonito es hacer un favor sin que tengan que pedirte! Las personas que lo hacen es porque están atentas a las necesidades de los demás. Abren sus ojos grandes, y también el corazón, y ayudan a otros para que tengan una vida más fácil. **AYUDAR ES MARAVILLOSO.**
¿A quién tenéis vosotros alrededor que podáis ayudar?

- 31 -

FAVORES QUE FACILITAN LA VIDA

Querida familia, ¿os parece que esta semana pensemos en qué **favores podemos hacer a los demás**? Igual que escribimos en la agenda los deberes que tenemos cada día para que no se nos olvide hacerlos, también podemos anotar cada día un favor que vamos a hacer a alguien **para que su vida sea más fácil**.

JUSTICIA Y AGRADECIMIENTO

Para que tú tengas justicia en tu vida es importante **reconocer el trabajo de los demás y agradecer todo lo que la vida nos ofrece** a diario. El colegio, los centros de salud y sus médicos, la policía, las personas que recogen la basura... Hay muchísimas personas trabajando para que tu vida sea más cómoda y justa. Así que es justo dar las gracias.

Yo le doy las gracias a mi abuelo. Sabe cuándo hacemos los deberes con cuidado.
Y aunque no estén bien, siempre nos anima.

Yo te doy las gracias a ti, mamá, porque a mí me das tareas que puedo hacer y a Pablo tareas que puede hacer él, que es más pequeño. Eso me parece justo.

Gracias, mi amor. Yo os doy las gracias a los dos porque me ayudáis cuando estoy cansada. Y es justo que yo también descansar un poquito. Os quiero mucho.

Es justo **DAR VALOR A LA AYUDA QUE RECIBIMOS**. Si no lo hacemos, nuestros niños pueden pensar que se lo merecen todo sin reconocer el esfuerzo y la dedicación de quien les hace la vida más fácil. Y aunque es cierto que las personas merecemos siempre cosas bonitas, también lo es que no todo el mundo las tiene.
Agradecemos a quien hace que **nuestra vida sea más justa**.

- 32 -

MEDITAR VIENDO UN CARACOL

Meditar, respirar, practicar mindfulness... Hay muchos niños que en el colegio y en casa hacen estos ejercicios y se llenan de paciencia por dentro. ¿Te animas a meditar?

Mamá, nosotros hacemos meditación en el cole. Nos sentamos en el suelo, cerramos los ojos, sentimos nuestra respiración y nos quedamos un ratito quiéti, sin hacer nada más.

¡Me encanta! ¿Y cómo te sientes después de meditar?

Al principio no me salía y estaba raro, pero ahora que he aprendido me siento **aspetraquillo**.

Mamá, ¿podemos hacerlo en casa?

Claro, mi amor. ¿Probamos antes de hacer los deberes?

Yo te enseño, Pablo, y la hago contigo.

Un ejercicio muy sencillo consiste en sentarnos en una alfombra en el suelo, cerrar los ojos, descubrir qué emoción sentimos en ese instante y averiguar qué la ha provocado. También podemos recordar algún momento especial de la semana. De esta manera, al **MEDITAR**, **avanzamos más** **conciencia de nosotros mismos** de nuestro interior.

- 33 -

MIS MOMENTOS IMPACIENTES

Todos hemos perdido la paciencia alguna vez. Es normal. Hay situaciones o personas que nos **generan impaciencia**: cuando tenemos hambre y no está la comida, cuando es tu cumpleaños y deseas abrir los regalos... En esos casos podemos ponernos nerviosos y enfadarnos y entonces es cuando **tenemos que trabajar la paciencia**.

Amores, ¿qué os hace perder la paciencia?

Yo, cuando dibujo, me dan ganas de romper el papel cuando los dibujos no salen mal.

Yo cuando no entiendo los deberes de matemáticas. Me siento torpe.

Si podemos en qué momentos perdemos la paciencia, estaremos preparados y así seremos más pacientes. Os propongo el siguiente ejercicio: saca el dibujo de la tortuga, míralo y dices «mamá de la calma, trae la paz a mi vida».

¿Y así conseguiremos ser más pacientes?

Mi vida, muchas veces solo necesitamos respirar y calmarnos. La tortuga nos ayuda a parar.

Queridos niños, ayudados entre todos. Si conocéis alguna situación que impaciente a vuestros padres, ayudadlos también. Por ejemplo, podéis colocar una tortuga en el aspirocero del coche para que no pisen cuando el semáforo se pone en verde y el de delante no avanza. ¡QUE NOS ENTRA MUCHA PACIENCIA AL VOLANTE!

- 34 -

El valor del ESFUERZO

El esfuerzo nos ayuda a **conseguir las tareas que son difíciles**, esas que nos cuestan muchísimo. Gracias al esfuerzo, **las personas mejoramos, crecemos y podemos superar obstáculos**, dificultades y lograr muchas cosas en la vida. El esfuerzo también ayuda a controlar el enfado o la rabia.

YOU ARE AWESOME

Miriam Tirado • Sheila de la Maza

B de Blok • 2025 • Hardcover • 160 x 220 mm • 190 pp

The essential guide for pre-teens and teens, by **Miriam Tirado**, the author behind the "My name is Goa" series.

Being a pre-teen or teenager isn't easy at all. Not even a little! Sometimes you don't even understand yourself: your emotions get all jumbled up, your mind never stops, and your body grows and changes at an uncomfortable pace.

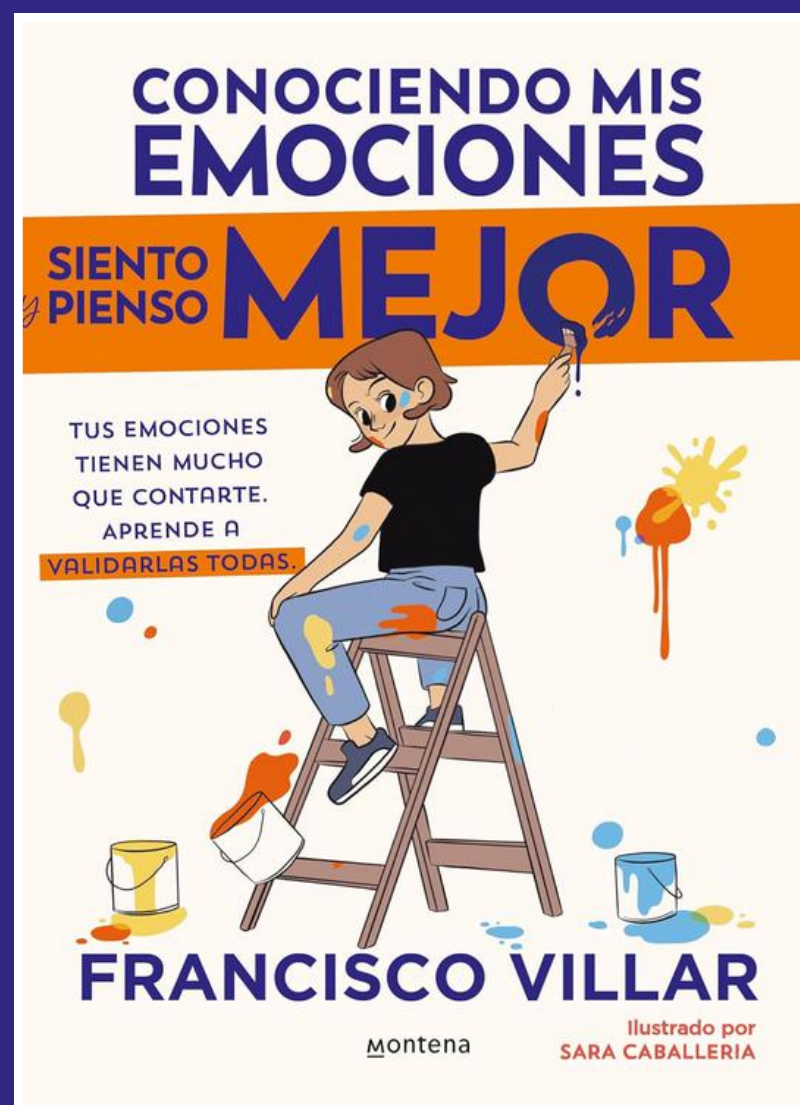

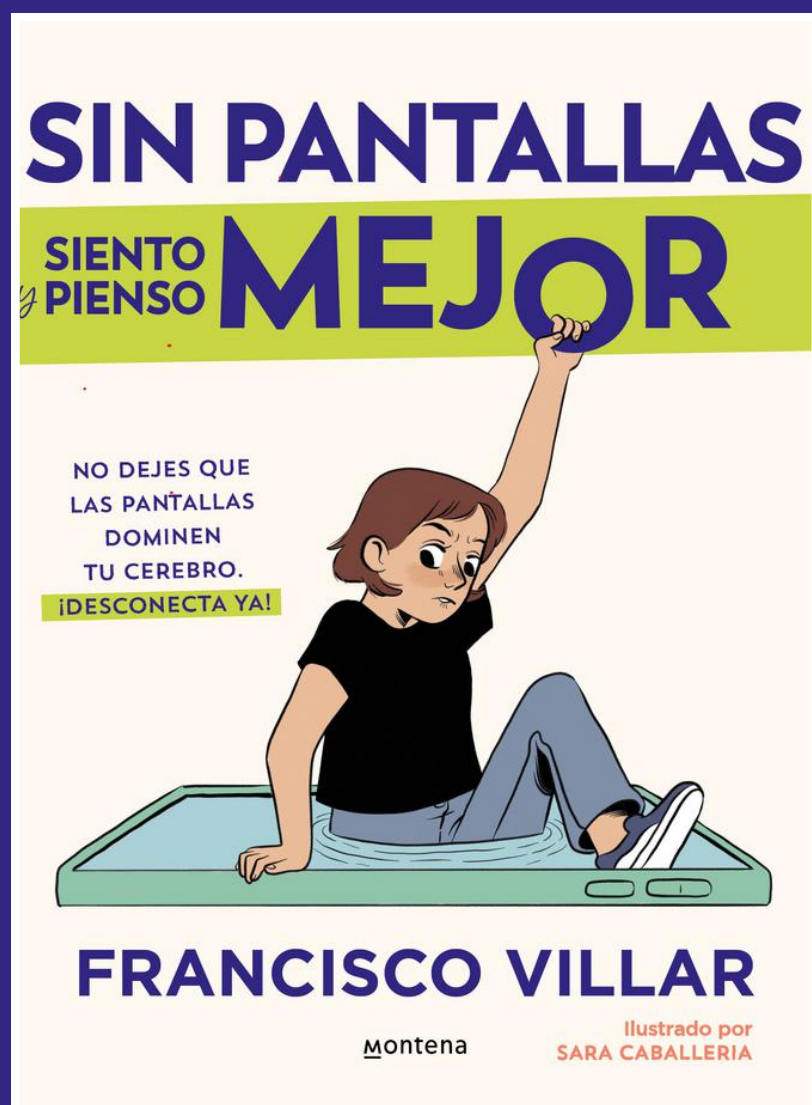

It can feel like you're drowning.

In this book, Miriam Tirado shares all the secrets, tricks, and tools young readers need to "surf" the waves of adolescence, no matter how big they are. The goal is to feel more confident, love yourself more, and most importantly, enjoy this stage of life, too.

Your first Sexual Education book.

Discover all the answers in this essential book for young children to learn about the incredible and wonderful process of how human beings are made.

The Menstruita Mini children's collection, created by psychologist and sex education specialist Anna Salvia and illustrator and multimedia producer Cristina Torrón, comes after the publishing phenomenon Periods are Cool to help you talk about sexuality in a direct, simple, and fun way.

Includes a guide for families and educators!

SELLING POINTS

- Childhood Sexual Education: an essential resource for families and schools to foster conversation and self-knowledge.

Mamá se da cuenta de que está embarazada porque no le viene la regla, tiene los pechos grandes y está más cansada. A partir de ahora necesitará dormir mucho, comer bien y estar en forma, porque su cuerpo trabajará todo el día haciendo al bebé. ¡Y eso es una tarea enorme!

Mamá y bebé
son como un solo ser.

Si mamá está
tranquila,
el bebé
también.

Comen
lo mismo.

Siempre
van juntos.

A lo largo de la vida, el cuerpo humano va cambiando... ¡y el aspecto de la vulva también! Cuando una niña se hace mayor su vulva se convierte en la vulva de una adulta: más grande, oscura ¡y con pelos!

A lo largo de la vida, el cuerpo humano va cambiando... ¡y el aspecto del pene también! Cuando un niño se hace mayor su pene se convierte en el pene de un adulto: más grande, oscuro ¡y con pelos!

Cuando el bebé está preparado para nacer, mamá empieza a tener contracciones: su útero se pone duro y hace fuerza para abrirse. Las contracciones son cada vez más seguidas e intensas, hasta que el útero se abre lo suficiente para que pueda pasar el bebé.

A partir de ese momento, mamá empieza a empujar hacia fuera cada vez que tiene una contracción y, poco a poco, el bebé va saliendo del útero y bajando por la vagina.

SELLING POINTS

- Childhood Sexual Education: An essential resource for families and schools to foster conversation and self-knowledge.

EL DESEO DE SER MADRE

El deseo de ser madre, de concebir, gestar, parir, dar el pecho y criar a un hijo, puede experimentarse como una sensación física en el útero y los pechos, como un sentimiento de amor en el corazón, como una idea en la cabeza o como una certeza en lo más profundo de tu ser. Es muy íntimo y personal, cada una lo siente a su manera. A veces es muy suave, como un murmullo casi imperceptible. Otras veces es un huracán que sacude toda tu vida.

Un gran poder conlleva una gran responsabilidad

Hay mujeres que nunca llegan a experimentar, algunas lo sienten cuando ya están embarazadas y otras deciden no tener hijos y dedicar su energía creativa a otros proyectos vitales.

Actualmente, en tu cultura la mayoría de las mujeres tiene los hijos muy tarde, pero algunas adolescentes ya sienten el deseo de ser madres, porque esa posibilidad existe desde la primera regla. De hecho, en otras culturas muchas mujeres tienen su primer hijo antes de llegar a los veinte años.

Sin embargo, una cosa es sentir el deseo de ser madre y otra es serlo. La maternidad es una experiencia preciosa, pero también una gran responsabilidad que requiere de mucho tiempo y energía, así que debes valorar si estás en condiciones de cubrir las necesidades de un bebé y también las tuyas. Si no es el caso, es importante que entiendas en qué consiste la concepción y que intentes evitarla.

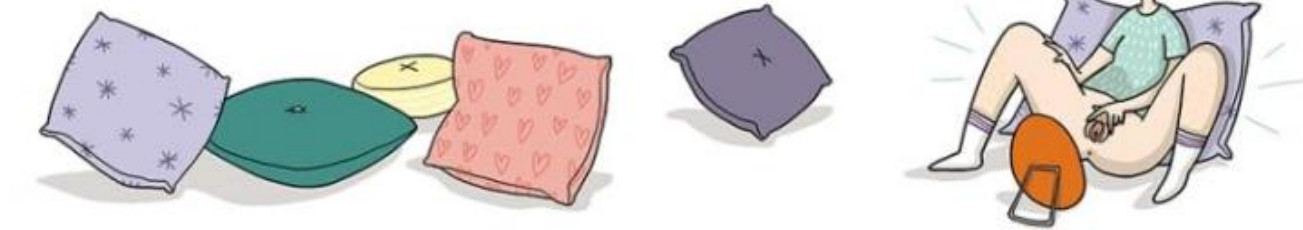

Para hacer esta propuesta, solo necesitarás un espejo y estar en un lugar en el que te sientas cómoda y donde tengas intimidad.

Sin ropa de cintura para abajo, siéntate cómodamente en tu cama, apoyando la espalda en algunos cojines, por ejemplo. Coloca el espejo entre tus piernas a una distancia en la que puedas ver bien la vulva y también el ano.

Es importante que el espejo se pueda aguantar solo, así tendrás las dos manos libres.

¡Antes de empezar!

- ✓ Asegúrate de tener las manos limpias y las uñas cortas.
- ✓ No te sientes desnuda en superficies que puedan estar sucias, como el suelo.
- ✓ Evita que aquello que toque el ano toque después tu vulva, porque pasarías la suciedad del ano a la vulva y la vagina y eso puede provocar infecciones vaginales o de orina.

¿QUERER SABER COSAS SOBRE SEXUALIDAD ES MALO?

La curiosidad por saber cómo funcionan el mundo, los animales y las personas forma parte de la naturaleza humana, y eso incluye el interés por la sexualidad. Desde bien pequeñas, las personas quieren y necesitan saber cómo son los genitales y para qué sirven, qué es el enamoramiento, el amor y el sexo, y cómo se hacen los bebés, entre muchas otras cuestiones.

Pero vivimos en una cultura en la que muchos peques y adolescentes no pueden hablar sobre este tema con sus familias y profes, así que acaban buscando información y resolviendo sus dudas en internet. Si el dispositivo no está protegido, es posible que la respuesta llegue en forma de porno.

Querer saber cosas sobre sexualidad es una necesidad humana que todo el mundo tiene y que no es mala, sino todo lo contrario: es un aprendizaje que mejora la vida de las personas de todas las edades.

El problema aparece cuando las respuestas a tus preguntas las da el porno, porque, tal y como veremos en los siguientes capítulos, el porno es un pésimo educador sexual.

La curiosidad por la sexualidad es buena y natural.

EL SANGRADO MENSTRUAL

La menstruación no es sangre como la que corre por tus venas, sino que es una mezcla compuesta por sangre, moco de puerta abierta y endometrio.

El número de días que menstrúas y la cantidad y las características del sangrado pueden variar de un ciclo a otro y según la época de la vida en la que te encuentres. Tienes que fijarte en:

la duración

La regla puede durar entre 3 y 7 días. Decimos que la regla ha terminado cuando ya no sale nada de la vagina o cuando el flujo vuelve a ser blanco o transparente.

la cantidad

La cantidad total de sangrado que expulsas durante la fase menstrual es de entre 25 y 80 ml, unas 3 cucharadas.

Sin embargo, la cantidad varía cada día. Los primeros dos días son los que expulsamos más cantidad y luego va disminuyendo, hasta ser solo flujo vaginal teñido de marrón.

el color

La regla tiene un color diferente cuando acaba de salir de la vagina y al cabo de un rato. Esto se debe a que se oxida al entrar en contacto con el aire.

El color del sangrado va cambiando a medida que avanza la menstruación. El primer día es más bien rojo y los días posteriores se va oscureciendo hasta volverse marrón.

la textura

El primer día la menstruación es bastante fluida, con pequeños coágulos. Poco a poco, se irá volviendo más densa.

el olor

El olor de la regla también va cambiando durante toda la menstruación.

- The perfect series to learn and have fun at the same time.

SUPER GENIUSES

H.M. Zubieta • Juanje Infante

Alfaguara I&J • 2023/2024 • Hardcover • 190 x 260 mm • 64 pp • 4 colors • 3 titles

When Supergenios have a question, they won't stop until they find the answer!

Alejo, Mar, Teo, and Bruna are four curious kids eager to learn about volcanoes, tornadoes, tsunamis, dinosaurs or the human body. To do so, they'll travel to the center of the Earth, journey back to prehistoric times, and even explore the inside of the human body.

En condiciones seguras (es decir, cuando no hay tsunamis), se pueden aprovechar las **olas fuertes** en playas larguísima para hacer **surf** o **body surf**, que es como el surf, pero con el cuerpo, ¡sin tabla! Desde la Antigüedad, culturas como la inca o la polinesia ya lo practicaban.

Los cuatro amigos, con unas **tablas holográficas** que había generado el ordenador, se pusieron también a hacer surf durante el maremoto! Claro, ellos no podían ahogarse en el tsunami porque los estaba ayudando **el superordenador**, ¡qué morrol! Sin embargo, el cielo se oscureció: la nube de humo y cenizas que había salido del volcán cada vez era más negra, como un nubarrón de tormenta... ¿Y empezaron a ver rayos y oír truenos?

EN EL AÑO 2011, EN JAPÓN, UN TSUNAMI PROVOCÓ UN DESASTRE RADIATIVO PORQUE INUNDÓ UNA CENTRAL NUCLEAR!

LA MÍ ME ENCANTAN
LAS OLAS!

¡Y A MÍ, Y A MÍ!
AUNQUE SEAN TRES VECES
MÁS AÍTAS QUE YO!

EN LOS TSUNAMIS
PUEDE HABER A LA VEZ
OLAS GIGANTESCAS
Y OLAS NORMALES.
UNAS ENCIMA
DE OTRAS.

34

35

Hace más de cincuenta millones de años, evolucionaron los **primates**, a los que llamamos monos. De ellos, vinieron los **hominidos** y, más tarde, los **humanos**.

ASÍ FUNCIONA
LA EVOLUCIÓN:
MUCHOS CAMBIOS
MUY PEQUEÑOS
DURANTE UN LARGO
TIEMPO.

¿DE AQUÍ
HEMOS VENIDO
NOSOTROS?

La palabra «primates» significa «**los primeros**», «**los mejores**» (y llamarlos así es un poco arrogante, porque los humanos también somos primates), pero a simple vista **no eran tan distintos** del *Plesiadap*.

El primer primate parecía un **monito**: muy pequeño, como los lémures, agarrado a la rama de un árbol con manos y pies.

Aunque no tenemos **fósiles** de todas las especies que han existido...

¡Si podemos rellenar los huecos con los que tenemos y deducir cómo serían!

ARCHICEBUS.
EL PRIMATE PRIMIGENIO

2. Casi todos los primates, monos y simios, **incluso tú y yo** hemos evolucionado a partir

Habilidades: ser monísimo (¿lo pilláis?). **Comio insectos porque era muy pequeñito,** medio menos de 30 cm y pesaba 30 gramos.

Quando nos hacemos **adultos**, dejamos de producir las hormonas que nos ayudan a crecer. Además, llegamos a un **límite** en el que nuestros huesos ya no pueden hacerse más largos porque se chocan unos con otros, ¡por eso no podemos crecer más!

La sangre llega al hígado cargada de nutrientes y hormonas por una vena que se llama **porta hepática**.

Aquí es donde se filtran, limpian y simplifican al máximo los nutrientes: **proteínas, carbohidratos y grasas**.

El hígado solo deja pasar las cosas limpias, pero a veces le damos mucho trabajo o se llena de **porquería**, como los filtros del aire llenos de pelusa.

BAJO EL MAR

¡Allí no había ningún dinosaurio! Teo, Mar, Alejo y Bruna buceaban en medio de la oscuridad, dentro de una **burbuja**. ¡Fuera había agua! Agua oscura y profunda, un mar que los rodeaba por todos los costados. Pero en aquel mar no había dinosaurios. **¡ni tampoco peces!**

¡HOLA,
PECECITOS! JOPE,
¿POR QUÉ NO HAY
PECECITOS?

**¡TAMPOCO HAY
DINOSAURIOS!**

PERO ES
NO ES UN
DINOSAURIO
ES UN TUBO

¿QUÉ SON ESAS
COSITAS QUE SE
MUEVEN?

ESTOS TUBOS SE
LLAMAN FUENTES
HIDROTHERMALES.

POR ELLOS
EL PLANETA
SOLO TENIA CALOR Y
GASES. IGUAL QUE
EL TUBO DE ESCAPE
DE UN COCHE!

LUCA.
CESTRO UNIVERSAL

 Vivió hace **4.350 millones de años**, en la era Paleozoica.

Se llama así por las siglas en inglés de «último antepasado común universal»: es el tataratataratatarabuelo de todos los seres vivos de la Tierra.

Habilidades: convierten el calor y los gases del agua en energía, (para LUCA, el agua caliente es como un bebida riquísimo)

Los puntitos eran bichillos minúsculos. **Bacterias!** Las primeras bacterias nacieron aquí, en el fondo del mar, y vivían y se nutrían del agua hirviendo, de los **gases** y **minerales**. Fueron los primeros seres vivos y los más sencillos. Todos los demás han evolucionado a partir de ellas, y los científicos les pusieron el nombre de **LUCA**.

Para entender de dónde vienen los dinosaurios (y nosotros), hay que empezar mucho antes, y todo comienza aquí. Bajo el mar, hace más de **cuatro mil millones de años**.

En el fondo del mar había **agujeros y tubos** por donde salían chorros de **agua caliente**. A su alrededor, en la corriente, flotaban puntitos diminutos. El agua hervía porque bajo la roca había **lava**; el planeta se acababa de formar, estaba recién salido del horno.

LAS PROTEÍNAS
SON COMO LOS
LADRILLOS DE UNA
CASA. FORMAN
NUESTROS
MÚSCULOS.

LOS
CARBOHIDRATOS
O AZÚCARES NOS DAN
ENERGÍA Y FUERZAS
PARA MOVERNOS
Y QUE FUNCIONE
EL CUERPO

LAS GRASAS TIENEN
MUCHAS FUNCIONES:
DAN ENERGÍA. FORMAN
MEMBRANAS QUE SON COMO
ESCUDOS O FUNDAS PARA LOS
ÓRGANOS... ¡Y DE ELLAS
ESTÁ HECHO EL
CEREBRO!

**¡YO NO QUIERO
TENER PELUSAS EN
EL HÍGADO!**

ALCOHOL.
UNA AMENAZA PARA EL HÍGADO

El alcohol que tienen el vino, la cerveza y otras bebidas es como un **veneno** para nuestro cuerpo.

Mientras **el hígado filtra ese veneno y lo limpia**, algunos adultos se sienten mareados, confusos..., ¡borrachos!

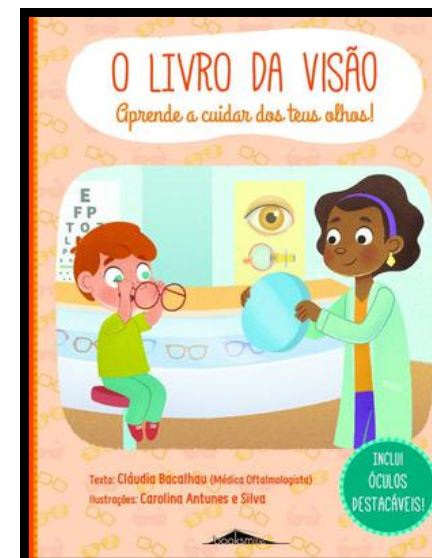

Si alguien bebe mucho alcohol de golpe o a menudo, el hígado se puede estropear, ¡es muy peligroso!
