## WOMEN PHOTOGRAPH: WHAT WE SEE

- 85% of photojournalists are men. Almost everything that is reported in the world is seen through men's eyes; spaces and communities men don't have access to are left undocumented. With the camera limited to the hands of one gender, photographic 'truth' is more subjective than it seems.
- This book flips that bias and presents a revisionist contemporary history showing what and how women photojournalists see through 100 photographs.
- Each shot is accompanied by 200 words from the photographer about the experience and the subject, offering fresh insights and a much-needed woman's perspective
- 4,200 copies sold in its first 3 weeks of publication!

**Wordcount:** 25,500 words

**Extent:** 224 pages
