## A Sleepy Soundbook: The Magic Bedtime Train Ride

written by Becky Watson illustrated by Lauren Degraaf

- A bedtime routine you can rely on: Titles in the Sleepy Soundbook series have gentle, calming narratives and soothing nature sounds, with strong ASMR appeal. This title will tap into the perennial popularity of train books for this age range.
- Highly giftable: This format is well suited to little hands, with easy-press buttons and Pantone inks for a luminous effect.
- Enticing, child-centred treatment: Warm but contemporary and stylish art from Lauren Degraaf will position this book competitively in this space, and the story includes animal characters for universal appeal.

Extent: 24

TPS (h x w): 240 x 279 mm

Wordcount: c. 500 words

## My First Story Orchestra x 4 titles:

- The Nutcracker / Swan Lake (UK pub: Sep 2024)
- Four Seasons in One Day / Carnival of the Animals (Mar 2025)

- Beautiful board books with simple text and sounds that are perfect for introducing babies to The Story Orchestra series. Press the easy-to-push button on each spread and hear a snippet of the composer's music. Market for babies to differentiate them from the main editions.
- We all know that classical music can soothe babies and stimulate brain development. There are proven benefits for children who listen to and play music, including improvements in maths, reading, and motor skills. Directing this series at babies would tie in with this research and help set the youngest readers up to enjoy the original series when they're older.

### SAMPLE SPREADS

WIP

I entered the ship to shore, but to my horror I found the pirates had taken over the first. Doctor Lacey had given up the promise made to return for his life. Something was wrong, though. Long John Silver looked tired and fearful. He took me to one side and whispered in my ear. "My men are going to kill me and take the treasure. I know it! If you help me escape, I promise I won't double-cross you again." But could I trust the word of a pirate?

When the map the pirates found a path through the stormy jungle to where the treasure was hidden... but it had gone! Scrambling through the empty pit, they roared with anger. Just then, Captain Smollett and his loyal crew burst through the bushes and shut at the pirates, starting them off. "But if the treasure isn't here, where is it?" I asked.

But Captain Smollett, out from the undergrowth, "I found it months ago and moved it into my secret cave. Come and have a look - I bet you've never seen such mountains of gold! I'll happily share it if you take me home." Oh yes, we eagerly agreed.

But what happened to Long John Silver, you ask? That day pirates searched home with us and search every work just one bag of gold. Even now, all these years later, I sometimes dream of Treasure Island. I can still hear Silver's guttural in my ear, screaming "Bones of silver!"

Lights positioned to illuminate each pop-up scene

# World of Wonders: Iconic Monuments

Written by Clive Gifford and Illustrated by Naida Mazzenga

- Discover 13 of the world's iconic buildings like never before: lift flaps and open gatefolds to explore scenes of life as it was at the time of the building's prime
- Combines detailed photographs of the buildings, humorous and instructive illustrations and educational content written in a very accessible style
- Search-and-find prompts encourage the reader to pore over the artwork and notice cultural and historical details

NEW

Extent: 32pp

TPS (h x w): 290 x 235mm

### SATURN

#### Put a ring on it!

All the really big planets in our solar system have rings around them, but Saturn's are the largest and the brightest. It's the furthest planet from Earth to have been spotted without the help of a telescope. Saturn's rings are made up of pieces of rock from asteroids and comets that were blown up as they approached the planet's gravity. These rocky fragments are covered in ice and dust and range from tiny specks to bits as big as mountains! It also has lots of moons in its orbit.

 9½ x the width of Earth

 -180°C

 146 moons

 29 years to orbit the Sun

## Dive into the Ocean – Immersive 3D Viewer

illustrated by Mike Love

### GREAT WHITE SHARK

#### A fierce fish with deadly jaws

This big shark rose to fame after it appeared in the scary 1975 movie *Jaws*. In real life, it rarely attacks people, preferring to eat other fish, seals and even dolphins. The great white shark has rows of razor-sharp teeth, and uses its amazing sense of smell to track down prey from miles away. Great whites can chase their food at over 45 kilometres per hour, and sometimes leap right out of the water! Their babies are called pups and are already 1.2m long when they're born.

### TRICERATOPS

**Easy to recognize, with three horns and a fancy frill!**

Triceratops lived at the same time as Tyrannosaurus and would have had to defend itself so it didn't get eaten. In fact, scientists found part of a fossil Triceratops skull with a T. rex-sized bite taken out of one horn! As well as protecting its neck, scientists think Triceratops might have used its bony frill to make sure it didn't get too hot or cold, to tell each other apart and to impress other dinosaurs.
